

OUR AREA IS A LINEAR CITY STRUCTURED AS A COMB SYSTEM, SHAPED BY THE VISTULA RIVER, AGRICULTURAL FIELDS, AND A LARGE-SCALE METABOLIC LANDSCAPE. DK80 DEFINES THE EDGE OF THE CITY AS A STRONG INFRASTRUCTURAL BOUNDARY. ABOVE IT, THE URBAN FABRIC DEVELOPES AS A GRADED TISSUE WITH LOCAL METABOLIC SYSTEMS CONNECTED TO THE GLOBAL ONE. FURTHER UP, THE RAILWAY LINE FORMS ANOTHER STRONG AXIS, WHILE THE FOREST DEFINES THE NATURAL EDGE OF THE CITY. BETWEEN THESE ELEMENTS, A CENTRAL GREEN CORRIDOR ACTS AS A BUFFER AND SPINE, CONNECTING ALL SYSTEMS INTO ONE CONTINUOUS URBAN ECOLOGY.

ONE EXAMPLE OF LOCAL METABOLISM IS THE ORCHARD SYSTEM LOCATED BETWEEN SINGLE-FAMILY ROW HOUSES WITH SEMI-PRIVATE GARDENS ACTING AS A BUFFER. THE OPEN BUT NOT FULLY ENCLOSED FORM OF THE HOUSING CREATES AN INTIMATE RELATIONSHIP WITH THE ORCHARD. THIS LANDSCAPE IS OPEN TO EVERYDAY USE, ALLOWING RESIDENTS TO ENJOY THE HARVEST, SUPPORT SOCIAL INTERACTION, AND PROVIDE SPACE FOR RELAXATION.

THE GREEN LINES CREATE A CONTINUOUS ECOLOGICAL NETWORK SPREADING FROM THE MAIN GREEN CORRIDOR INTO THE CITY. THEY CONNECT HOUSING, PUBLIC SPACES, GREENHOUSES AND FOREST, FORMING LOCAL METABOLIC SYSTEMS INSIDE THE URBAN FABRIC. THIS GREENERY WORKS AS A BUFFER, PEDESTRIAN STRUCTURE AND BIODIVERSITY CORRIDOR, MAKING THE CITY FUNCTION AS ONE LIVING LANDSCAPE.

THE SYSTEM OF PUBLIC GREENHOUSES AS SHARED AGRICULTURAL INFRASTRUCTURE. THESE SPACES COMBINE PRODUCTION AND SOCIAL USE, LINKING FOOD GROWING WITH DAILY LIFE. THEY ARE OPEN TO THE PUBLIC, ALLOWING PEOPLE TO EXPERIENCE CULTIVATION PROCESSES AND ENGAGE WITH URBAN AGRICULTURE

ONE EXAMPLE OF LOCAL METABOLISM IS THE ORCHARD SYSTEM LOCATED BETWEEN SINGLE-FAMILY ROW HOUSES WITH SEMI-PRIVATE GARDENS ACTING AS A BUFFER. THE OPEN BUT NOT FULLY ENCLOSED FORM OF THE HOUSING CREATES AN INTIMATE RELATIONSHIP WITH THE ORCHARD. THIS LANDSCAPE IS OPEN TO EVERYDAY USE, ALLOWING RESIDENTS TO ENJOY THE HARVEST, SUPPORT SOCIAL INTERACTION, AND PROVIDE SPACE FOR RELAXATION.
